

OKU - SPECIALISTS IN CNC PRECISION MECHANICS

Precision engineering OKU manufactures high tolerance, small to medium-sized precision components.

TYPICAL SIZE OF PRODUCTS

0,1 – 10 kg

TYPICAL DELIVERY BATCH SIZES

1 – 40 000 pc.

PRECISION UP TO

a thousandth
of a millimetre

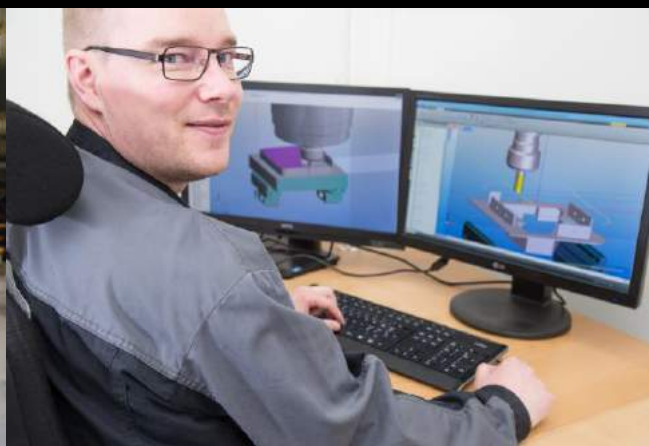

OKU®

Quality Precision Engineering

OKU- Quality Precision Engineering

With over 40 years of proven expertise, our services are designed to turn the sophisticated demands of our customers into reality.

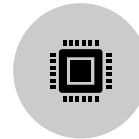

- EST. 1978, Outokumpu, Finland
- A family run business with over 40 years of proven expertise
- Specialising in manufacturing high-quality precision components
- ISO 9001 certified since 2001

OUR SERVICES

Complete CNC machining services with the latest CNC automated technology

Services ranging from one-off/sample prototypes to repeatable contract manufacturing

Product traceability

Absolute dimensional accuracy (accuracy up to micron level)

In-house design optimization services (CAD/CAM)
Fabrication Technology-based Consulting

Storage and delivery service (constant availability and quick delivery guaranteed)

SECTOR EXPERIENCE

Through our continual investment in technology, we have gained a reputation for excellence with exceptional quality.

We provide our expertise for a number of industries that require the highest possible accuracy and quality standards e.g.

- Military & defence industries
- Aerospace industry
- Medical industry
- Fiber optics industry
- Forestry industry
- Food industry

MULTI-TALENT IN MATERIALS

We skilfully conduct processing of machinable or electrically conductive special materials. Our commonly machined materials include:

- Steel
- Titanium
- hard metal
- nickel alloys
- aluminum
- brass / copper
- plastics
- advanced high-strength aviation materials

QUALITY ASSURANCE

OKU is fully committed to the highest quality assurance standards and holds an ISO 9001 certificate for its management quality system. This is supported by regular internal and external auditing.

ISO 9001 Certified

Meeting the international quality management system means you can be confident in the work we do.

ISO 14001

OKU complies with the environmental responsibilities and sustainability act.

AQAP 2110

OKU complies with the defense industry mandates where required.

AS/EN 9110

OKU complies with the aviation industry mandates where required.

Passion for Precision Engineering Since 1978

OKU - Your Partner in Precision Engineering
